***Response to Amendment***

Applicants' amendment filed on December 01, 2004 has been entered on December 15, 2004.

Therefore claims 1 and 2 as amended by the amendment and claims 2-15 and 20 to 33 as previously filed are currently pending in the Application.

Claims 16-19 were previously cancelled.

***Reasons for allowance***

Claims 1-15 and 20-33 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include a process of depositing non-single crystalline SiGe- containing material wherein the silane portion is a higher -order silane represented by the formula  $\text{Si}_n\text{H}_{2n+2}$  wherein  $n = 3$  to  $6$ , which higher silanes according to Mr. Michael Todd's declaration is critical to producing the unexpected result, namely the graded SiGe -containing film is deposited at a deposition rate that is a substantially linear function of the amount of germanium precursor namely trisilane and the higher silanes (apparently the silane and disilanes precursors do not produce a substantially linear function).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
